

SUPRATECH

Wi-Fi MODULE

Parameters		Functions
Power Supply	DC5V	<p>The main purpose of Wi-Fi module is AI camera calibration and parameter setting. This module connects with AI camera through USB2.0 interface, and then a Wi-Fi hotspot will be generated. After connecting with Wi-Fi hotspot via mobile phone and entering the specified browser webpage, AI camera calibration and parameter setting can be conducted.</p>  <p>Advanced Driving Assistance System</p> <p>Pedestrian Detection Camera</p> <p>Wi-Fi Module</p>
Power Dissipation(5V IN)	230mA	
IMS Band	2.4G	
Reserving System	IEEE 802.11b/g/n standard	
Communication Interface	USB 2.0	
Wire Length	90mm	
Operating Temperature	-20 ~ +70°C	
Storage Temperature	-30 ~ +80°C	
Dimension	102 x 47 x 11 (mm)	
Weight	25g	
Shell colour	Black
